TEAM ID	PNT2022TMID24184
PROJECT NAME	PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT
MAXIMUM MARKS	4 MARKS

STEP-1: TEAM GATHERING, COLLABORATION AND SELECT THE PROBLEM

STATEMENT1: DEFINE PROBLEM STATEMENT:

A medicine reminder app will be designed for people who randomly/frequently forget to take their medicine. Elders who are suffering to identify their daily medicines, due to their carelessness. Its mainly feature distinguishes it from other apps on the market, allowing them to keep track of their medicines and remotely assist your loved ones who find it difficult to utilize such an app with their reminders

STEP-2: BRAINSTORM, IDEA LISTING AND

GROUPING2: BRAINSTORM :

Thejaswini.B

it should contain audio via reminder (for blind people)

to keep track of their medication regimens or appointments

It should operate in offline mode also

Application should alert to refill the medicine

K.mrudula

It should be implemented in smart watch or other wearable devices

It should also remind to take water to rest, to walk etc.

In abnormal health situation smart watch should auto-dial emergency contact

Reminding of medicine before or after food

y.prathyusha

Easier way to keep reminder on android phone is to use google assistant

The application should include digital calendar

For instance lets say you have to take medication in the morning

Set medication reminders once and it should be up to date

v.susmitha

Medicine name strength dose should be displayed

Medicine should have QR codes which should have medicine information

'Mood-aware' IOT devices should be implemented

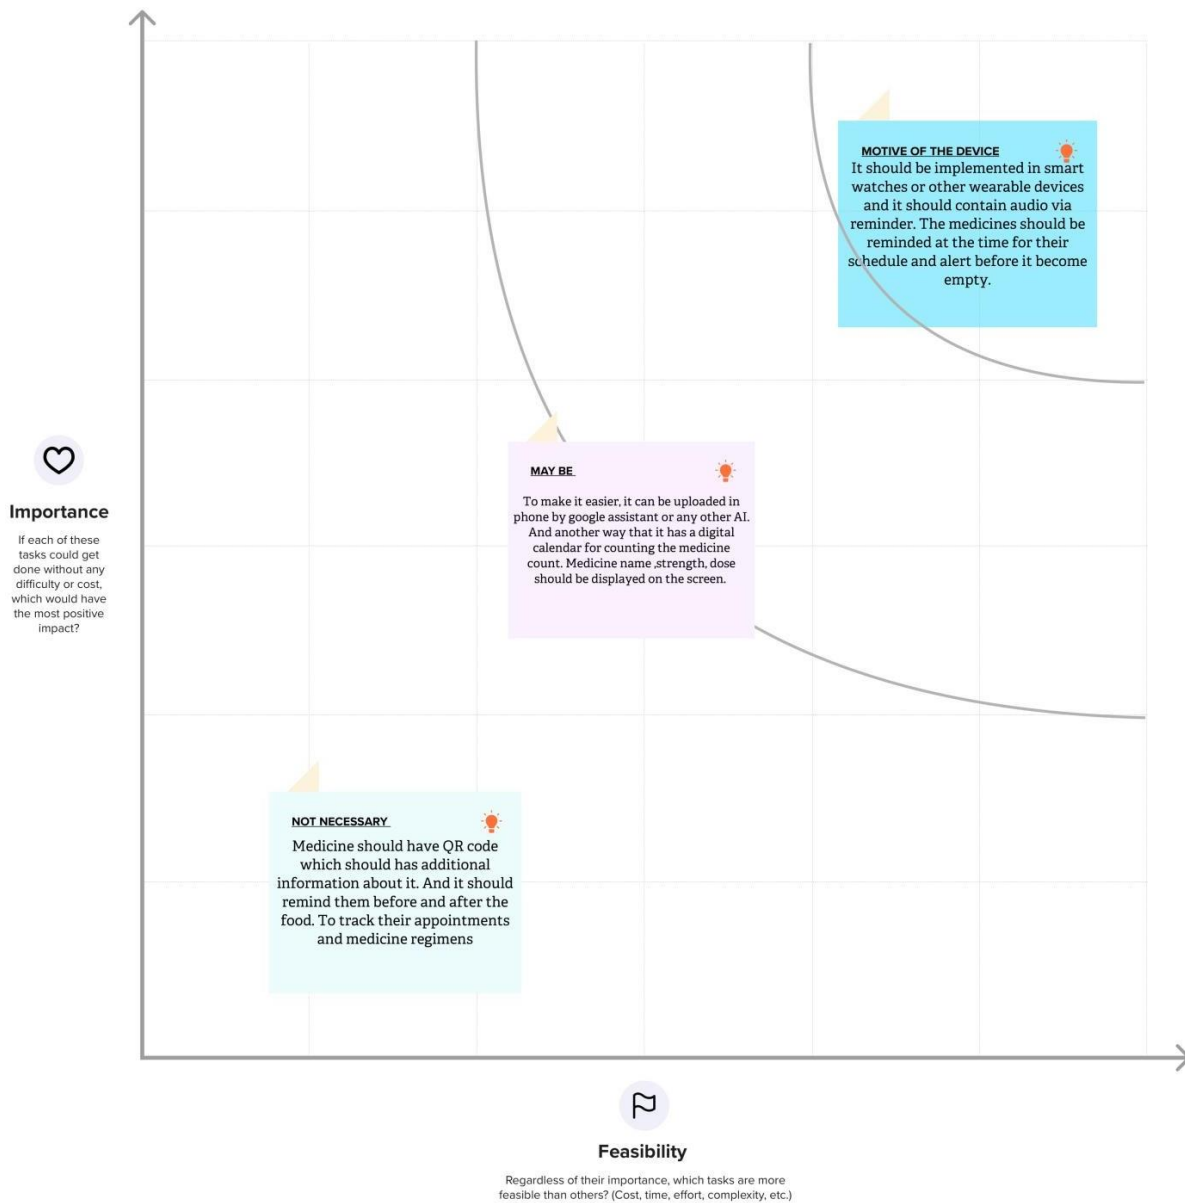

It should remind the time to take medicine customer requirements should be fulfilled

3: GROUP IDEAS:

- >Medicine name, Strength, dose should be displayed.
- >Application should alert to refill the medicine.
- >It should be implemented in smart watches or other wearable devices.
- >It should operated in offline mode also.
- >Set medication reminders once and it should be up to date

Step-3: Idea
